

## Why a new shelter?

The current facility is not adequate to accommodate the growing population of homeless animals.

### A new shelter will:

- ◆ Provide humane facilities for dogs, cats, and livestock.
- ◆ Provide an inviting center where a family will be comfortable selecting a pet.
- ◆ Provide resources to promote pet population control and to educate the community on the importance of spaying and neutering.
- ◆ Provide quarantine space for treatment of ill or diseased animals to prevent the spread of infections to an adoption room.
- ◆ Provide sufficient housing for animals in the event of a county emergency (fire, flooding, earthquake, etc.).

## Why now?

The current facility is a disheartening place to visit.

Ask anyone in the county and they will say "Something should be done now!"

- ◆ Now because: the old shelter is in the way of new construction.
- ◆ Now because: the Calaveras Humane Society is willing to build and operate a new shelter.
- ◆ Now because: the people of Calaveras County need a facility they can be proud of to help increase community responsibility.
